

What does Open Access mean?

Open Access to scientific literature means it is freely available to the public on the internet. This service should give authors control over the integrity of their work, and respect their right to be properly acknowledged and cited.

The Hornemann Institute provides this for you.

<http://open-access.net>

Hornemann Prize for Open Access

With the Hornemann Prize for Open Access we honour one of the authors who published a much demanded thesis of high quality free of charge on our website. The scientific quality will be reviewed by an external scientific advisory board.

Hornemann Institute

The Hornemann Institute supports the worldwide transfer of knowledge in the field of conservation-restoration. Since 2003 it has been part of the University of Applied Sciences und Arts Hildesheim/Holzminden/Göttingen. It bears the name of the first German explorer of Africa, Friedrich Konrad Hornemann, who was born in Hildesheim in 1772.

ACADEMIC THESES ON THE INTERNET

in the Field of Conservation-Restoration

at the Hornemann Institute

Why bother trying?

You are improving your chances
for employment
in your chosen profession.

Why bother trying?

Is there any use in a great academic thesis for you, if only you, your examiners, and a few friends ever know about it, or if the results are only published as an abstract without showing your scientific research? Making an academic thesis available in an academically-controlled way means:

- You are improving your chances for employment in your chosen profession.
- You are contributing to advancing academic research, because it is very time consuming and often impossible to obtain or incorporate unpublished scientific findings.
- On an international level, it is becoming more and more common to make academic work available via the internet. In England, for example, universities are assembling large repositories for the dissertations of their students.
- Highly esteemed institutions, including the Getty Conservation Institute in Los Angeles and the International Institute for Conservation of Historic and Artistic Works (IIC) in London, are supporting the fight against „grey literature“.

Our Service is free for everyone

The Hornemann Institute provides online facilities for you towards publishing your academic work. These facilities allow you to exceed the standard information, such as titles and abstracts in German and English. We offer you the opportunity to include pictures, content pages and references to your printed publications that are connected with your thesis. You can also have your complete paper available for download.

Copyrights must be observed in electronic publications as well as in print publications. This means you may have to obtain the rights of use for images, and others must observe your copyright. Our authors keep unrestricted access with their user data to their records and are able to correct any errors or delete the texts. All copyrights will be maintained by the authors. Further publications are possible at any time.

We could give your data a persistent identifier

To make electronic papers and pictures easier to quote, we offer our authors a „persistent identifier“ for important publications. With a persistent identifier, it becomes possible to quote your online publications internationally. These DOIs (Digital Object Identifiers) can be searched in the catalogues of many well-known libraries worldwide and are accepted by many scientific journals as citations.

The fight against „grey literature“

We wish to abolish „grey literature“, and we want all academics to have the opportunity to publish their work.

Therefore we additionally publish on our website:

- Conference Papers
- Documentation Records
- Articles
- Project Papers
- Videos
- Posters of Poster Sessions
